

Albury Brothers Boats

The Stainless Steel products on your boat are made to the highest quality standards. Stringent quality control processes such as metallurgical analysis; precision polishing, multiple inspections, and Six-Sigma procedures ensure the highest quality possible. In order to ensure that your Stainless Steel maintains its beautiful finish it is critical that you care for it properly.

WARNING: Your Stainless Steel can be damaged by exposure to acids and other corrosive agents found in many cleaning products. A partial list of additives that may cause staining and a weakening of the finish are provided below. Use of these and other similar solutions to clean your boat can cause your Stainless Steel to bleed.

- Chlorosulphonic Acid
 - Ferrous Iodide
 - Hydrobromic Acid
 - Iodine
 - Sodium Chlorite
 - Sulphur Chloride
 - Bleach
- Comet
 - EZ-ON, EZ-OFF Cleaner
 - Ferric Chloride
 - Flourine
 - Hydrofluoailic Acid
 - Silver Chloride
 - Sodium Hypochlorite
- Sulphuric Acid
 - Muriatic Acid
 - On & Off Cleaner
 - Rust StainsAway
 - Ferrous Chloride
 - Hydrochloric Acid
 - Hydroflouric Acid
- Sodium Biflouride
 - Stannic Chloride
 - SnoBol
 - Soft Scrub
 - Marine Spray Nine

CLEANING AND CLEANSERS

Frequent cleaning of your stainless steel with soap, water, and Cleaning Wax will help maintain the finish. Always rinse the metal thoroughly with clean water and dry completely. Clean soft cloths or pads should be used. The use of steel wool pads or other highly abrasive brushes or sponges are not recommended and will damage the surface. Contamination of the surface by chemicals, dirt, or other material hinders the passivation process and traps corrosive agents, thus reducing corrosion protection.

There are many Cleaning Wax and Protectant choices. Just to name a few: 3M, Filiz, Woody Wax, Collinite, Alumaguard, plus those made by Shurhold, Starbrite and so forth.
